

TW1- 2BL20

Extra Heavy

Long Arm,

Walking Foot.

From: CAMSEW

TYPICAL

Servo 1HP Belt Drive Motor

AC servo motor, control box.

AC step-servo motor: 1HP, Low power consumption with 750 watts output, smooth, and very quiet, top speed adjustable by

operator. Synchronised to always stop with needle down. Easy on the environment, and the pocket.

Long Arm

Ample working area to the right of the needle.

20" X 7.5cm

51 X 19cm

Standard arm available.

Manual Lubrication.

Machine lubricated by hand.

Side Load Extra Large Bobbin

Extra Large 34.5 X 12.3mm bobbin no need to remove work to change bobbin.

Standard Walking Feet

Full range of extra feet available , piping , narrow for zips.

Background

The Seiko SK 8BL20 which in turn is based on the Singer 132K6 this machine is made by Typical in China. The Typical TW1-2BL20 is the same machine. The K6 machine has been around for a long time I have seen machines 70+ years still in operation, their origins would be older than this.

Anybody that knows the K6 would acknowledge that this is a machine that was built for very heavy work, and as a reputation as the best machine for this kind of work. The Singer 132U6 was for a while a re badged Seiko machine.

Seiko realised that the one improvement that was needed was a reverse, and second, a more positive top feed would be an improvement. The walking foot on the K6 is dragged along by the lower feeder, Seiko im-proved on this by having a direct drive for the top feed, this in turn can be adjusted to give slightly less or more feed than the lower feeder. However, the stitching mechanism, bobbin case, bobbin is exactly the same as the K6, put simply it could not be improved on.

The Typical is exactly the same machine as the Seiko SK 8BL20, and is made in China with a Japanese stitching mechanism, and bobbin case.

Model	Stitch	Heaviest Thread.	Feed	Top Speed	Stitch Length	Foot Lift	Needle	Bobbin	Made in
TW1-2BL20	Lock stitch	3M	Walking foot	900 rpm	0-13mm	13mm Pedal	328 DDX1	35X12mm	China

Warranty

12 Months on site warranty, parts, and labour.

With delivery, and setup (Melbourne Metropolitan Area)

All other areas 12 months return to point of purchase, with a \$100.00 discount towards freight.

Camsew have been importing Typical machines for 8 years, we are the only authorised Australian dealer. Having direct access to parts, and technical information.

CAMSEW Importers of **Typical**, and **CAMSEW** industrial sewing machines.
